

International Society of Biometeorology

Welcome to CCTR 2024!

April 22-26, 2024

The International Society of Biometeorology (ISB), in collaboration with Thompson Rivers University, cordially welcomes scholars and practitioners from all around the world to share their most recently completed and ongoing research at the [Eighth International Conference on Climate, Tourism and Recreation – CCTR 2024](#).

We invite presentations on topics including but not limited to:

- Climate services and communications in tourism and recreation
- Indigenous knowledge, tourism and climate change
- Last chance tourism from a climate change perspective
- Touristic and recreational footprints and climate change mitigation
- Tourism and recreation destinations' vulnerability and resilience to climate change
- Degrowth in tourism and recreational area limits in climate change affected regions
